I'm a seasoned software engineer, that have in-depth knowledge of all components of the stack, with vast experience on backends and data processing.

EXPERIENCE

Birtwell **Software engineer** 2018 - Present.

MVP of a Big Data microservices platform

Go, Python, Spark, Jupyter, NLTK, Docker, Kubernetes, Microservices, REST, Scalability, PostgreSQL, Redshift, AWS, S3.

[Phishlabs](#) **Software engineer** 2018 - (6 Months project)

Email relay service to detect and process phishing threats. Patterns analysis, AI.

Go, Python, Docker, Kubernetes, Microservices, REST, Scalability, MySQL, Elasticsearch, TDD, NLP

[GIVE foundation](#) **Blockchain developer** 2018 (3 months ad honorem collab)

MVP of charity Dapp, smart contracts, crowdsale, tokens, charity off-chain API

Solidity, Go, REST, Geth, Ethereum, React/Redux, Metamask

[Jovio](#) **Full stack developer** 2016 - 2017

Microservices architecture, React/Redux, PostgreSQL, Tuning, Big Data, Data Integration, REST, Blockchain. Continuous Integration (CI), Continuous Deployment (CD), Github, TDD

Projects:

Blockchain, smart contracts Real estate Dapp for shared property ownership

Solidity, Go, Geth, Ethereum, React/Redux, React Native, Dapp, Docker,

Big Data, microservices, external Data providers API Integrations

React/Redux, NodeJS , Go, PostgreSQL, Elasticsearch, AWS, Docker,

IOT Solution for Homes/Real Estate

Golang, raspberry-pi, Zwave , PostgreSQL, React Native,

[FullStack Labs](#)

Full stack developer 2015 - 2016

React/Redux, React Native, Node.js, Express, MongoDB, MySQL, PostgreSQL
Go, Python, Rails, PostgreSQL, SQLite, Electron, Ethereum, Agile, Jira, Unit
Testing, TDD, Github, Zenhub, Bitbucket,

Projects:

Platform redesign and implementation

Define and implement new architecture from an existing Ruby on Rails app to
React/Redux, horizontal clustering, immutable storage
React, NodeJS, Express, PostgreSQL

Blockchain trade transactions solution

Solidity, Go, Geth, Ethereum, Restful API

Typing tests desktop app with a centralized server

React/Redux, Electron, node.js, MongoDB, SQLite, web sockets

Time tracking app: Tasks and time tracking integrated with toggl.com API

React/Redux, toggl.com API, Flask API in Python

Repricer

Amazon offers pricing web app

React/Redux, socket.io, rabbitmq , Amazon marketplace API , NodeJS, MongoDB

[Kombi Labs](#)

Founder, Full stack developer 2007- 2015

React.js, Ember.js, Angular.js, Node.js, Golang, Ruby, Rails, Golang, C
Customers: PMC, Educ.ar, Posterita, Buenos Aires Ciudad, F&B Logistics, Biz-XRay,
Fullstack Labs

Projects:

Salesforce platform

Mobile and web salesforce application from Logistics corp.
Golang, React, React Native, NodeJS, PostgreSQL.

Issue tracking system, assets management for a big corp (25k empl.)

Golang, Ember.js, Redis, PostgreSQL, Elasticsearch

Financial Analytics ecommerce platform (Shopify API)

Python, Ember.js, PostgreSQL.

Retail POS /ERP

Python API, Ember.js , PostgreSQL

Dbas

Founder, CTO 1998-2007

Database support, first commercial PostgreSQL support in Argentina
Customers: Argentina: CTI, Telecom, Metrogas, Buenos Aires City Government, AFIP, Citibank, Banco Industrial, Banco Credicoop.
U.S: PMC, Posterita
Honduras: Tengo

Basf Corporation **Database manager** 1996-1998

Regional Data Warehouse project member.
Data extraction and mapping from SAP/R3.
Data transport software development. Intranet development.
Data Warehouse project implementation in Mt. Olive, NJ, USA.

Accenture **Senior Programmer** 1994-1996

Projects:
CTI Movil - Mobile telecommunications
Credit Lyonnais - Bank
Telefonica - Telecommunications .
YPF - Oil company

EDUCATION

JFKennedy university of Argentina 2002
Systems Analyst - IT

ABOUT ME

I'm a self-motivated, self-taught person. I like to never stop learning and improving. I like to build things. I'm proud of my work but humble. I enjoy to be part of a team.
Others things that I like to do are spend time with my family - my wife and two kids -, ride my bike, homebrew beer and play music.

SKILLS

Golang , React / Redux, React Native, Electron , Node.js, Express, Ruby, Rails, PostgreSQL, Hadoop, Redis, Elasticsearch, MongoDB, Angular 1.x, C, Python, Lua, Java,API, Big Data, Docker, Microservices, AWS, Agile, Scalability, Tuning, Continuous Deployment (CD), REST, GraphQL, Algorithms, Continuous Integration (CI), Git, Unit testing, TDD, Design Patterns, Availability, Networking, Open Source, Configuration Management (CM), NoSQL, Artificial Intelligence, Security, OOP, Machine Learning Deployment, Web services
